Taranaki *arts* trail

28-29 -30 Oct & 4-5-6 Nov 2022

Welcome to Taranaki for our ninth Trail.

Our committee is grateful for the vital support of sponsors, patrons and local businesses as well as the artists. Seventy nine artists (many first time on the Trail) and just six days to see them might seem a bit daunting but fortunately many artists open their studios to visitors by appointment outside the Trail dates and this brochure is intended to last the year between Trails.

On this Trail you can find fascinating photography and objects imaginatively rendered in glass or stone or wood, clay, fibre, metal etc as well as many types of painting and printmaking. In effect the Trail is run as though it were one big diffuse exhibition for the community, but more importantly, it is to have our artists available to talk to a lot of interested people.

The intention of my work is to make you aware of the wellbeing of the Ocean. For me the Ocean is the most beautiful part of the world with all its blue and purity, especially in the Pacific. Alarmingly these colours are fading as well as its creatures. The Ocean hasn't the power to stop the abuse and attacks from human side. Restoring and respecting their world will both give us the rights to live, destruction will end both worlds.

The layered process of grisaille (dead layer painting) is a fascinating method for an artist. It is anything but dead! A limited monochrome palette renditions form and value in three dimensions. I'm currently exploring a deconstructive process where the dead under layer is part of the finished work.
